- [PC-Intel Windows NT 4.0 Workstation](#)
- [PC-Intel Windows NT 3.51 Workstation](#)

MapObjects -- Windows Edition 1.2 on PC-Intel Windows 95

<i>Product:</i>	MapObjects -- Windows Edition 1.2
<i>Platform:</i>	PC-Intel
<i>Operating System:</i>	Windows 95
<i>Shipping/Release Date:</i>	December 18, 1997

Hardware Requirements

CPU Speed:

90 MHz*

*Minimum requirement.

Processor:

Pentium Class Processor

Memory/RAM:

64 MB*

*Minimum requirements. Depending on development and deployment purposes, RAM should be much higher.

Notes:

VGA or higher resolution monitor (Graphics card required)

Limitations

Product: When using the AIT RADEON 7500 AGP video card, many stray lines may appear across the map. This occurs only on computers using the standard Microsoft video drivers that ship with Windows for that card. Go directly to ATI and get the most up-to-date driver for that card (6.13.10.6071 (dated 2002-06-04)) and install that. This should resolve the issue.

At the time of release, MapObjects-Windows Edition 1.2 was supported on Windows 95, 98, NT 3.51, and NT 4.0. However, due to the Microsoft support cycle, NT 3.51 and 95 are no longer supported. Refer to Microsoft support pages for OS lifecycle support status:

[http://support.microsoft.com/default.aspx?scid=fh;\[ln\];LifeWin](http://support.microsoft.com/default.aspx?scid=fh;[ln];LifeWin)

MapObjects -- Windows Edition 1.2 on PC-Intel Windows 98

<i>Product:</i>	MapObjects -- Windows Edition 1.2
<i>Platform:</i>	PC-Intel
<i>Operating System:</i>	Windows 98
<i>Shipping/Release Date:</i>	December 18, 1997
