- [PC-Intel Windows 98](#)
- [PC-Intel Windows NT 4.0 Workstation](#)
- [PC-Intel Windows XP](#)

MapObjects -- Windows Edition 2.1 on PC-Intel Windows 2000 Professional

<i>Product:</i>	MapObjects -- Windows Edition 2.1
<i>Platform:</i>	PC-Intel
<i>Operating System:</i>	Windows 2000 Professional
<i>Shipping/Release Date:</i>	March 23, 2001

Hardware Requirements

CPU Speed:

90 MHz*

*Minimum requirement.

Processor:

Pentium Class Processor

Memory/RAM:

48 MB*

*Minimum requirements. Depending on development and deployment purposes, RAM should be much higher.

Disk Space Requirements:

200Mb with full program files install:

MapObjects2 Folder - 102 Mb

System - 15Mb

Common Files - 67Mb

MS_Shared - 3Mb

Notes:

VGA or higher resolution monitor (Graphics card required)

Limitations

Product: When using the AIT RADEON 7500 AGP video card, many stray lines may appear across the map. This occurs only on computers using the standard Microsoft video drivers that ship with Windows for that card. Go directly to ATI and get the most up-to-date driver for that card (6.13.10.6071 (dated 2002-06-04)) and install that. This should resolve the issue.
