Limitations

Web Server:

1. Mapnotes and editnotes folders are not created in ArcIMS Administrator. This will be fixed in the next release of ArcIMS.
2. iPlanet does not allow a space in the path when creating a virtual directory. This causes a problem when trying to create one for Manager, since it is installed under Program Files by default.

The workaround is to install ArcIMS somewhere other than under Program Files.

Limitations

Web Server:

1. Mapnotes and editnotes folders are not created in ArcIMS Administrator. This will be fixed in the next release of ArcIMS.
2. iPlanet does not allow a space in the path when creating a virtual directory. This causes a problem when trying to create one for Manager, since it is installed under Program Files by default.

The workaround is to install ArcIMS somewhere other than under Program Files.
