**Notes:**
Loading mandatory OS subsets:
Compaq Fortran for Tru64 UNIX Alpha Systems Run-Time Support (/usr/shlib/libfor.so) is required for ArcInfo software. In this example, CDROM is SCSI #4.
1. Mount Tru64 UNIX Associated Products CD: mount -dr /dev/rz4c /cdrom.
2. Load subset from /cdrom/ALPHA using the 'setld -l' command.

Oracle Patch Support
Oracle 9.0.1.2.0 or higher 9.0.1 or 9.2 patch set level as per Oracle Corporation's Patch Set Overview documentation.

A bug in Oracle9i is causing UNION ALL to fail when using bind variables. The Oracle bug number is 2105414. The Oracle TAR submitted by ESRI for this bug is 1877212.995. Oracle has stated that the bug has been scheduled to be fixed in the Oracle 9.2 release. Oracle has suggested a work-around for the problem: setting the hidden initialization parameter _push_join_union_view to false. At Oracle 9i, the default for this parameter is true. It is suggested that this be set in the initialization file so that the change takes effect for the entire database: _push_join_union_view=false After making this change to the initialization file, you will have to restart Oracle in order for the change to take effect. ESRI is in the process of testing this work-around. As of this writing, the work-around remedies the related ORA-00600 errors. ESRI is investigating any side effects the changing of this feature may cause. If there are any side effects of implementing this change, this document will be updated.

Oracle Patch Support
Oracle 9.0.1.2.0 or higher 9.0.1 or 9.2 patch set level as per Oracle Corporation's Patch Set Overview documentation.

9.0.1.2.0 NOTE:
A bug in Oracle9i is causing UNION ALL to fail when using bind variables. The Oracle bug number is 2105414. The Oracle TAR submitted by ESRI for this bug is 1877212.995. Oracle has stated that the bug has been scheduled to be fixed in the Oracle 9.2 release. Oracle has suggested a work-around for the problem: setting the hidden initialization parameter `_push_join_union_view` to false. At Oracle 9i, the default for this parameter is true. It is suggested that this be set in the initialization file so that the change takes effect for the entire database: `_push_join_union_view=false` After making this change to the initialization file, you will have to restart Oracle in order for the change to take effect. ESRI is in the process of testing this work-around. As of this writing, the work-around remedies the related ORA-00600 errors. ESRI is investigating any side effects the changing of this feature may cause. If there are any side effects of implementing this change, this document will be updated.

Utilizing Windows Terminal Server technology may require additional MB, depending on the number of clients running off the server.

**Disk Space:**

ArcInfo Desktop 8.2:
605 MB NTFS
690 MB FAT32

ArcInfo Workstation 8.2:
695 MB NTFS

**Disk Space Requirements:**

Disk spaces do not include the 50 MB of system drive space needed for installation (typically C:\Winnt\System32). The disk space requirement for each of the ArcInfo 8.2 components are provided in the Setup program.

**Notes:**

**Internet Explorer 5.0 requirement:**

Some features of ArcInfo 8.2 require a minimum installation of Microsoft Internet Explorer Version 5.0. The setup program offers an English installation of Microsoft Internet Explorer Version 5.5.

If you are using a non-English operating system, you must obtain and install the appropriate language version of Internet Explorer 5.0 previous to installing ArcInfo 8.2.

**License Manager Requirements:**

Simple TCP/IP, Network Card or Microsoft Loopback Adapter.

**For the best performance, the following are recommended:**

- True color monitor with a minimum of 16MB video card
- An OpenGL graphics card is recommended to optimize performance in ArcScene. Texture mapping will be better optimized using an OpenGL graphics card with 32MB, or more, of on-board texture memory.
- Installation to a fast, NTFS (New Technology File System) hard drive is strongly recommended.

If you are using a non-English operating system, you must obtain and install the appropriate language version of Internet Explorer 5.0 previous to installing ArcInfo 8.2.

**License Manager Requirements:**
Simple TCP/IP, Network Card or Microsoft Loopback Adapter.
For the best performance, the following are recommended:
- True color monitor with a minimum of 16MB video card
- An OpenGL graphics card is recommended to optimize performance in ArcScene. Texture mapping will be better optimized using an OpenGL graphics card with 32MB, or more, of on-board texture memory.
- Installation to a fast, NTFS (New Technology File System) hard drive is strongly recommended.

605MB NTFS
690MB FAT32

ArcInfo Workstation 8.2:
695MB NTFS

Disk spaces do not include the 50MB of system drive space needed for installation. (Typically C:\Winnt\System32)

**Notes:**

**Internet Explorer 5.0 requirement:**
Some features of ArcInfo 8.2 require a minimum installation of Microsoft Internet Explorer Version 5.0. The setup program offers an English installation of Microsoft Internet Explorer Version 5.5.

If you are using a non-English operating system, you must obtain and install the appropriate language version of Internet Explorer 5.0 previous to installing ArcInfo 8.2.

**License Manager Requirements:**
Simple TCP/IP, Network Card or Microsoft Loopback Adapter.

**For the best performance, the following are recommended:**
- True color monitor with a minimum of 16MB video card
- An OpenGL graphics card is recommended to optimize performance in ArcScene. Texture mapping will be better optimized using an OpenGL graphics card with 32MB, or more, of on-board texture memory.
- Installation to a fast, NTFS (New Technology File System) hard drive is strongly recommended.

**Database Notes**
9.0.1.2.0 NOTE: A bug in Oracle9i (9.0.x NOT 9.2.x) is causing UNION ALL to fail when using bind variables. The Oracle bug number is 2105414. The Oracle TAR submitted by ESRI for this
bug is 1877212.995. Oracle has stated that the bug has been scheduled to be fixed in the Oracle 9.2 release. Oracle has suggested a work-around for the problem: setting the hidden initialization parameter _push_join_union_view to false. At Oracle 9i, the default for this parameter is true. It is suggested that this be set in the initialization file so that the change takes effect for the entire database: _push_join_union_view=false After making this change to the initialization file, you will have to restart Oracle in order for the change to take effect. ESRI is in the process of testing this work-around. As of this writing, the work-around remedies the related ORA-00600 errors. ESRI is investigating any side effects the changing of this feature may cause. If there are any side effects of implementing this change, this document will be updated. 9.2.0.1.0 NOTE: In order to successfully run ArcSDE 8.2 for Oracle 9.2.0.1, it is necessary to install the latest service patch for ArcSDE 8.2 for your OS. The latest service patches may be found at: http://support.esri.com/

**Hardware Requirements**

- **Memory/RAM:** 32 MB RAM based on single user
- **Swap Space:** 100 MB minimum (see Notes)
- **Window System:** CDE or Open Windows (see Notes)
- **Disk Space:**
Notes:
Swap Space is the minimum required for a single user.

OpenWindows™ is now a support level of three (untested) due to the fact that we are now linking to Motif libraries, which are newer than the ones that OpenWindows utilizes.

Oracle Patch Support
Oracle 9.0.1.2.0 or higher 9.0.1 or 9.2 patch set level as per Oracle Corporation's Patch Set Overview documentation.

9.0.1.2.0 NOTE:
A bug in Oracle9i (9.0.x NOT 9.2.x) is causing UNION ALL to fail when using bind variables. The Oracle bug number is 2105414. The Oracle TAR submitted by ESRI for this bug is 1877212.995. Oracle has stated that the bug has been scheduled to be fixed in the Oracle 9.2 release.

Oracle has suggested a work-around for the problem: setting the hidden initialization parameter _push_join_union_view to false. At Oracle 9i, the default for this parameter is true. It is suggested that this be set in the initialization file so that the change takes effect for the entire database:
ushed_join_union_view=false

After making this change to the initialization file, you will have to restart Oracle in order for the change to take effect.
ESRI is in the process of testing this work-around. As of this writing, the work-around remedies the related ORA-00600 errors. ESRI is investigating any side effects the changing of this feature may cause. If there are any side effects of implementing this change, this document will be updated.

9.2.0.1.0 NOTE:
This will require the ArcSDE 8.2 QFE patch for support of Solaris Oracle 9.2. Please refer to the ArcSDE download page for further information on downloading this patch.
